## EDUCATION

|                                                                          |           |
|--------------------------------------------------------------------------|-----------|
| B.E CSE - Sri Eshwar College of Engineering    CGPA :7.7 (Lateral Entry) | 2025-2028 |
| Diploma (CCN) – Nachimuthu Polytechnic College    84%                    | 2022-2025 |
| SSLC – St.Avila Matriculation School    65%                              | 2021-2022 |

## PROJECTS

### Radar Monitoring Through IOT: 2025

Smart Radar Monitoring System – An IoT-enabled object detection and tracking system using radar sensors, embedded systems, and cloud technology. Features real-time data transmission, remote monitoring, and a web dashboard for radar visualization, showcasing skills in IoT, embedded programming, cloud integration, and web development.

**Tech Stack:** Embedded C, PHP, JavaScript, HTML, CSS.

### FarmYield AI – Crop Yield Prediction System Using ML 2025

Agricultural Crop Production Prediction – A Python-based machine learning web application using Scikit-learn and Streamlit to predict crop production from location, season, crop type, and cultivation area. It features data preprocessing with Pandas, NumPy, and Label Encoding, real-time prediction through an interactive interface, and model evaluation using R<sup>2</sup> Score and Mean Squared Error (MSE).

**Tech Stack:** Python, TensorFlow, RNN Models, MySQL, JavaScript, CSS.

### Digital Gate Pass Management System: [Website](#) 2025

A MERN stack web application developed to digitize campus gate pass and visitor management through a secure online platform. It enables students to submit gate pass requests, administrators to review and approve requests via a centralized dashboard, security personnel to verify and update pass status, and visitors to register with unique visitor IDs.

**Tech Stack:** React.js, Node.js, Express.js, MongoDB, JavaScript, HTML5, CSS3, REST API, JWT Authentication.

### StyleHub – Fashion E-commerce Application: [Website](#) 2026

Developed a full-stack fashion e-commerce application using React.js, Node.js, Express.js, and MongoDB, featuring user authentication, cart, wishlist, coupon system, order management, and an admin dashboard. Deployed on Vercel and Render. Implemented RESTful APIs with MongoDB Atlas integration and responsive UI to provide a seamless shopping experience across devices.

**Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, JavaScript, HTML5, CSS3, REST API, JWT Authentication, React Router, Vercel, Render.

## CERTIFICATIONS

|                                                         |      |
|---------------------------------------------------------|------|
| Top DBMS Interview Questions   <b>CodeChef</b>          | 2025 |
| SQL Intermediate & Advanced   <b>HackerRank</b>         | 2025 |
| Java Fundamentals Badge   <b>Oracle Java Foundation</b> | 2025 |
| Java Basics   <b>Simplilearn</b>                        | 2025 |
| Web Development   <b>Udemy</b>                          | 2025 |

## ACHIEVEMENTS

|                                                                                  |      |
|----------------------------------------------------------------------------------|------|
| 2 <sup>nd</sup> prize in project presentation at Fiestaa'26, KPRIET, Coimbatore. | 2025 |
| Secured Top 8 among 32 teams in the Tex-Research Hackathon at Yugam'26           | 2025 |
| Secured Top 106 team in Google developer groups solution challenge.              | 2026 |

## SKILLS

**Programming** - C | C++ | Java

**Web Technologies** - HTML | CSS | JavaScript | MERN

**Cloud&DevOps** – AWS | Vercel | Netlify

**Tools** - Linux | Git | Docker | Figma | PowerBI | Canva.

**Databases:** MongoDB | MySQL

**Libraires / Frameworks:** ReactJS | NodeJS | ExpressJS | NestJS | Mongoose
